- Cowboy Trigger
- Attention To Details
- Export Video Clips
- Supports Both Analog And Digital Capture

Finally An Affordable Top Quality Video Editing System!

Features

Quick and Easy Tagging

Just click with the mouse and tell the system what happened. The tagging of a game is intuitive user-friendly, and FAST.

Laptop Capture

Analyze a game on the road – in the bus, on a laptop of your own choice. The competition wants you to believe you need a ‘special laptop’ they provide. Don’t be fooled - The only thing really ‘special’ about that laptop will be the incredibly high price tag. Choose your own laptop and use the Sideline Video Analyzer to start analyzing anywhere!

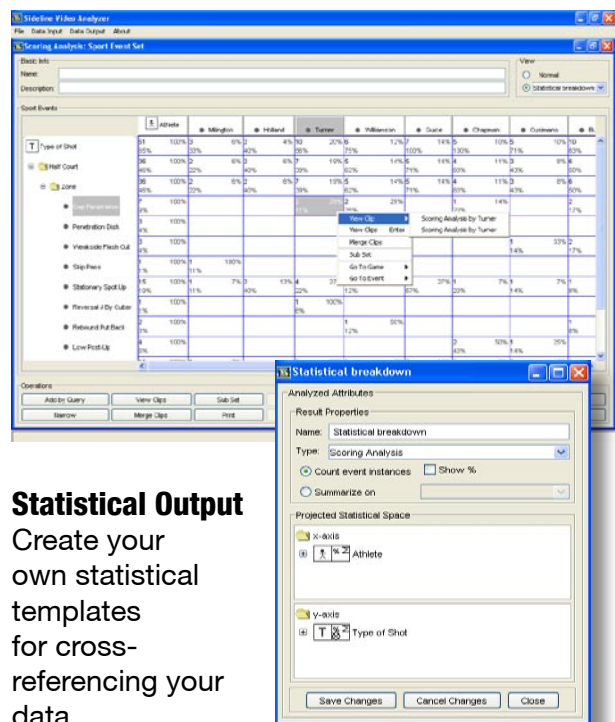

The Sideline Video Analyzer – a state of the art, cutting edge product which incorporates every feature found in more expensive video editing systems.

Why pay tens of thousands of dollars for a video editing system, when the Sideline Video Analyzer will outperform it for a fraction of the price?

Reports

Choose from your own templates – Get a report on anything you tagged.

- What are our most effective formations?
- What is our efficiency rating against different defensive looks and how can we improve that?
- What run/pass play balance is most effective for us?
- What play sequences most often generate positive yardage
- Give me all highlights for John Jackson!
- Anything you can imagine.

Statistical Output

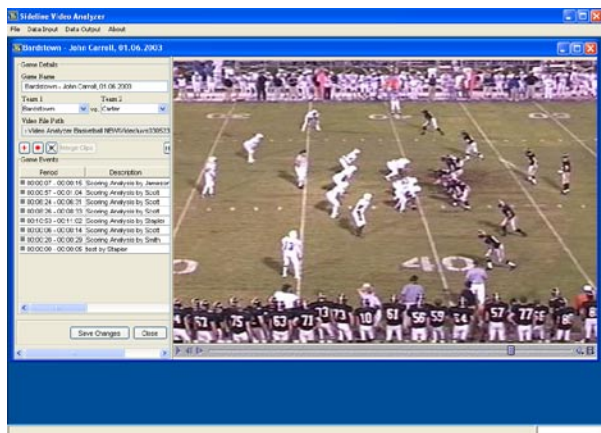

Create your own statistical templates for cross-referencing your data.

“Sideline Sports has developed cost effective products that have enhanced the efficiency of our entire department. The learning curve is relatively short, and the software is intuitive and easy to use. It has been immensely beneficial for our coaches. Sideline Sports doesn’t come with hidden licensing and maintenance fees. Every coach in the department can use the software at their desktop and on their laptop, without paying an additional fee to do so.”

– Richard Johnson, AD Wofford College, SC

Full Size Video Screen

In Sideline Video Analyzer you can analyze a game in it's full video size. Don't settle for anything less.

Cowboy Trigger - Attention To Details

The Cowboy Trigger Feature enables you to view each play frame-by-frame or in slow-motion to catch the details of what's happening in a video.

Export Video Clips

Export any video clip from the system and send to players.

Supports Both Analog And Digital Capture

Sideline Video Analyzer offers great quality with both analog captures and digital.

"The software did everything you promised and more"

– Kevin Carroll – St. Pius X Catholic HS

What Makes It Special?

User Friendly

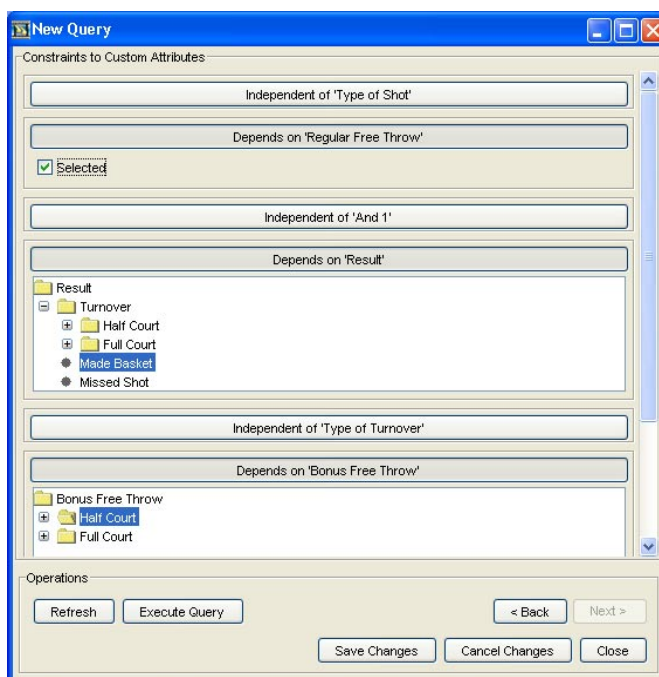

It's great to have a Video Director on your staff, but it shouldn't be necessary. If the Coaches themselves cannot use a video editing system, something is wrong. Sideline Video Analyzer is by far the user-friendliest video editing system on the market.

Completely Customizable

Coaching will never be standardized. No two coaches will analyze a game in the same way. Everything in Sideline Video Analyzer, tagging formulas, report templates and queries are completely customizable.

Never Throw A Game Away

The unique MPEG4 technology incorporated in the Sideline Video Analyzer allows you to store over 100 games on a regular desktop PC in top quality. You will never throw a game away.

"The best football coaching product I've ever seen."

– Joey Downs, Head Coach Bardstown High School, KY

Maximize Your Efficiency!

The family of Sideline products is compatible with the Sideline Video Analyzer. No other system gives you the synergistic function of combining Playbooks, Videos and text for the maximizing your teaching efficiency.

Sideline Sports is dedicated to the efficiency, organization and success of the progressive coach.
